IT ACCESSIBILITY & SECTION 508 LEADER

Digital Accessibility | Accessibility Strategy | IT Business Analysis | Product Leadership

PROFESSIONAL SUMMARY

IT accessibility and business analysis professional with experience integrating Section 508, digital accessibility, UX, technology, and business requirements within complex enterprise and national laboratory environments. Experienced managing accessibility technology, partnering with IT and business stakeholders, supporting accessibility governance, and translating accessibility requirements into practical technology and user-experience solutions. Currently provide product ownership for an enterprise accessibility scanning platform used laboratory-wide to evaluate web domains. Complement accessibility expertise with substantial business analysis and product experience, including enterprise software implementation, custom application development, vendor coordination, requirements management, and cross-functional leadership.

CORE COMPETENCIES

Accessibility Leadership: Section 508 • Digital Accessibility • Accessibility Governance • Accessibility Program Development • Accessibility Strategy • WCAG • Accessibility Requirements • Accessibility Testing • Automated Accessibility Scanning • Inclusive Design • Accessible UX

Technology & Product: Product Ownership • Product Management • Enterprise Software • SaaS • Technology Evaluation • Vendor Management • Figma • UX / User-Centered Design • Requirements Management • SDLC

Business & Organizational Leadership: Business Analysis • Stakeholder Management • Cross-Functional Leadership • Requirements Elicitation • Process Improvement • Change Management • Strategic Planning • Facilitation • Customer Engagement

PROFESSIONAL EXPERIENCE

NATIONAL LABORATORY OF THE ROCKIES (FORMERLY NATIONAL RENEWABLE ENERGY LAB)

IT Business Analyst & Section 508 Coordinator / *Colorado | 2022-Present*

- Serve as an IT accessibility and Section 508 resource while providing business analysis and technology leadership across enterprise IT initiatives.
- Manage and provide product ownership for an accessibility scanning platform used across the laboratory to evaluate web domains for accessibility issues.
- Own stakeholder and product needs for the accessibility scanning solution, coordinating requirements, vendor engagement, capability evaluation, issue identification, and ongoing product improvement.
- Help stakeholders interpret automated accessibility scanning results and translate findings into actionable technology and remediation priorities.
- Integrate accessibility requirements into technology evaluation, business analysis, product decisions, UX discussions, and technology delivery.
- Partner with IT, UX, design, business, vendor, and customer stakeholders to identify accessibility requirements and develop practical solutions.
- Serve as backup product owner for Figma, bringing accessibility, usability, customer requirements, and product capabilities into enterprise product discussions.
- Contribute to accessibility awareness, education, organizational collaboration, and development of accessibility-focused practices.
- Helped establish the Accessibility Champions Employee Resource Group, supporting awareness, education, inclusion, accessibility, neurodiversity, disability, and organizational collaboration.

TEXAS A&M UNIVERSITY

Information Technology Business Analyst II | *2020-2022*

Information Technology Business Analyst I / *2018-2020*

- Translated complex business processes into clear functional requirements for development and technology teams and supported stakeholder validation, testing, and issue resolution.
- Created and maintained requirements, process, business analysis, and technical documentation supporting technology initiatives.
- Strategic liaison between university and external stakeholders and partners on full range of technology operations, maintenance and innovation to meet the primary mission of supporting education and research.
- Progressed from Information Technology Business Analyst I to Information Technology Business Analyst II with increasing responsibility and scope.

SELECTED PROJECTS & LEADERSHIP

Enterprise Accessibility Scanning Platform — Product Owner / IT Accessibility Lead — Laboratory-wide accessibility scanning platform supporting evaluation of web domains for accessibility issues.

Accessibility Champions Employee Resource Group — Founding / Development Contributor — Helped establish an employee-led initiative focused on accessibility, disability inclusion, neurodiversity, mental health awareness, education, and organizational collaboration.

Figma Enterprise Product — Backup Product Owner / IT Business Analyst — Support enterprise product needs while incorporating accessibility, UX, stakeholder requirements, product capabilities, and future-state technology considerations.
