SENIOR IT BUSINESS ANALYST

AI-Enabled Business Analysis | Enterprise Technology | Requirements Engineering | SDLC | Process Improvement

PROFESSIONAL SUMMARY

Senior IT Business Analyst with experience translating complex business needs into enterprise technology solutions across higher education, research, and national laboratory environments. Experienced throughout the full software development lifecycle (SDLC), including requirements elicitation, business process analysis, stakeholder engagement, solution architecture, testing, implementation, and continuous improvement. Skilled in leveraging generative AI and AI-assisted analytical tools to evaluate and refine business requirements, identify gaps, recommend technology solutions, support solution architecture development, and optimize administrative workflows. Key experience includes contributing to an enterprise-wide Learning Management System implementation, conducting end-to-end business analysis for a custom-developed Conflict of Interest Disclosure system, and managing product ownership of a laboratory-wide accessibility scanning platform. Combines technical and analytical expertise with cross-functional leadership, stakeholder management, and AI-enabled process improvement to deliver practical, user-centered technology solutions.

CORE COMPETENCIES

Business Analysis: Business Requirements • Requirements Elicitation • Requirements Management • Functional Requirements • User Stories • Acceptance Criteria • Business Process Analysis • Workflow Analysis • Gap Analysis • Current/Future State Analysis • Solution Evaluation • UAT

Technology: SDLC • Enterprise Applications • SaaS • Software Implementation • Product Ownership • Product Management • Systems Analysis • Technology Evaluation • Vendor Management • UX • Figma

AI & Emerging Technologies: Generative AI • AI-Assisted Business Analysis • AI-Assisted Requirements Analysis • AI-Enabled Process Improvement • Solution Architecture Support • AI-Assisted Solution Evaluation • Prompt Engineering • Workflow Optimization • AI-Assisted Documentation

Leadership: Stakeholder Management • Cross-Functional Collaboration • Facilitation • Customer Engagement • Vendor Coordination • Change Management • Process Improvement • Continuous Improvement

Specialized: Section 508 • Digital Accessibility • WCAG • Accessibility Testing • Automated Accessibility Scanning • Inclusive Design

PROFESSIONAL EXPERIENCE

National Laboratory of the Rockies (formerly the National Renewable Energy Lab)

IT Business Analyst & Section 508 Coordinator / *Colorado | 2024 – Present*

Information Analyst / *Colorado | 2022 – 2024*

- Lead business analysis activities supporting enterprise IT products, services, and technology initiatives, from requirements discovery through implementation and continuous improvement.
- Translate complex business needs and organizational processes into actionable requirements for technical teams, vendors, product teams, and stakeholders.
- Leverage generative AI tools to analyze and refine business requirements, identify gaps and dependencies, evaluate potential technology solutions, and support the development of solution architecture recommendations.
- Integrate AI-assisted analysis into business analysis workflows to accelerate requirements documentation, explore solution alternatives, and improve the clarity and consistency of deliverables for technical and business stakeholders.
- Apply generative AI to streamline administrative activities, synthesize information, draft documentation, and optimize recurring workflows, increasing personal productivity and allowing greater focus on strategic analysis and stakeholder engagement.
- Facilitate cross-functional discussions to clarify requirements, priorities, constraints, and desired outcomes among business and technical partners.
- Manage and provide product ownership for an enterprise accessibility scanning platform used across the laboratory to evaluate web domains for accessibility issues.
- Coordinate stakeholder and vendor engagement for the accessibility scanning product, including requirements, product needs, issue identification, capability evaluation, and ongoing improvement.
- Serve as a product owner for Figma, supporting enterprise product needs, customer requirements, accessibility considerations, and future-state capabilities.
- Evaluate technology solutions based on functionality, customer requirements, usability, accessibility, implementation considerations, and long-term sustainability.
- Develop requirements, process documentation, user guidance, and knowledge resources supporting consistent technology delivery and adoption.
- Serve as a key Section 508 and IT accessibility resource, integrating accessibility considerations into technology products, services, processes, and user experiences.

TEXAS A&M UNIVERSITY

IT Business Analyst II / *2020-2022*

IT Business Analyst I / *2018 - 2020*

- Translated complex business processes into clear functional requirements for development and technology teams and supported stakeholder validation, testing, and issue resolution.
- Created and maintained requirements, process, business analysis, and technical documentation supporting technology initiatives.
- Strategic liaison between university and external stakeholders and partners on full range of technology operations, maintenance and innovation to meet the primary mission of supporting education and research.
- Progressed from Information Technology Business Analyst I to Information Technology Business Analyst II with increasing responsibility and scope.

SELECTED PROJECTS & LEADERSHIP

Enterprise Learning Management System Implementation — Full-SDLC business analysis team member supporting implementation of a new enterprise-wide LMS.

Conflict of Interest Disclosure System — End-to-end business analysis for a custom-developed application, including process analysis, requirements, workflows, stakeholder engagement, and solution validation.

Enterprise Accessibility Scanning Platform — Product ownership and management of an accessibility scanning solution used laboratory-wide to evaluate web domains.

Figma Enterprise Product Support — A product owner supporting enterprise product requirements, customer needs, accessibility, UX, and future-state capabilities.

CERTIFICATIONS

Business Relationship Management Professional (BRMP) — Business Relationship Management Institute 2019

ITIL® 4 Foundation — PeopleCert 2022

Certified Professional in Accessibility Core Competencies (CPACC) — In Progress | International Association of Accessibility Professionals

EDUCATION

Texas A&M University — The Bush School of Government & Public Service | Master of International Affairs | 2017

Texas A&M University | Bachelor of Arts in International Studies | 2015
